DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, line 2, there is no antecedent for "the sonic range finder".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 3, 4, 5, 6, 11, 12, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by the US patent to Rando ('627).

With respect to instant claim 1, Rando discloses (see Fig. 13C) a measuring apparatus that includes a housing (102), a retractable tape (104) and a laser pointer (10). On col. 12, line 58 – col. 13, line 4, Rando suggests that an acoustic distance

Art Unit: 3662

measuring device (range finder) may be made integral with the laser pointer to enable accuracy of directional orientation in distance measurements. Claim 1 is so anticipated.

Claim 2 is anticipated by laser device (10).

Claims 3 and 6 are anticipated by display 162.

Claim 4 is anticipated by the aforementioned col. 12 wherein an acoustic range finder is suggested.

With respect to claim 5, see switch 156.

With respect to claim 11, it is argued that any tape measure has a lever to lock the retractable tape.

With respect to claim 12, it is anticipated that the measuring apparatus of Rando would measure an internal dimension (with the range finder) and external dimension (with the tape measure).

Claim 13 is anticipated by laser device (10) being used.

Claim 14 is anticipated by display 162 being used.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by the Gardiner et al PCT publication ('978).

With respect to claims 1 and 2, see page 3, second full paragraph of the Gardiner et al PCT publication.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7, 8 and 15-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Rando ('627).

Claims 7, 8, 17 and 18 specify that the apparatus claimed includes a standard and metric button to display the dimension in feet/inches or metric units. Although Rando does not specify the length dimension measurements in either feet/inches or metric units, it would have been obvious to one of ordinary skill in the art that a length measurement in feet/inches or metric units is within the purview of Rando's system.

With respect to claims 15 and 16, it is further obvious to one of ordinary skill in the art that using an acoustic range finder with a tape measure would include using a button or switch (i.e, switch 156) to display the length dimensions measured.

Allowable Subject Matter

6. Claims 9, 10, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claim 21 is allowed.

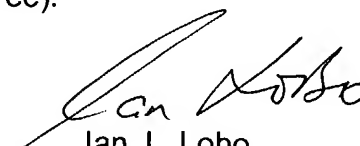

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
